into the common error that the center of population is moving westward. The Atlanta Constitution, on the contrary, maintains it is moving west by southwest, steadily toward the Mississippi, steadily toward the gulf. The center of population was on Southern soil in 1700. It is there to-day. During the war decade, from 1860 to 1870, it moved northwestward, but this has been the only exception. It must be sent hundreds of thousands to the West and Northwest, but even with this drain such States as Arkansas and Texas within the past five years have equalled and surpassed in growth of population such States as Minnesota. Old and well settled States like Virginia, the Carolinas and Georgia show a rapid increase. Even without immigration the South would hold her population because her families are so much larger and more prolific.

On Wednesday last, at Fire Hole Basin, in the Yellowstone Park, a son of Gen. O. O. Howard, commander of the Department of the Platte, shot himself through the lower part of the breast with the design to commit suicide. At last accounts his chances for recovery are very slim. He is a young man of about 19 years of age, who has been with Lieut. Kingman in the park throughout the season. The cause of the desperate act was a sudden and unlady whose name is so far concealed, but who passed through Livingston as one of a large East bound party. It is said the young man had never met the lady until he saw her in the park. Gen. Howard is now in the park on a tour of inspection. During about twenty four hours after the wound was administered it was believed to have been accidental, until young Howard confessed the facts.

A Very Tough Story. A very tough story, which is vouched for after a fashion, is going the rounds and given by the San Francisco Post for what it is worth. It is related that Mr. S- M- was sitting in his back yard talking to some friends when his attention was called to a ben with a broad of young chickens and a large rat that had emerged from its hole and was quietly regarding the young chickens with the prospect of a meal in view. As the rat came from his hole the house cat awoke from her afternoon nap and caught sight of the rat. Crouching low she awaited developments, and stood prepared to spring upon his ratship. Why Don't They Stare at His?

A certain wretch in the city takes pleasure in practices a little short of hendish. His field of operations is generally in street cars and his tactics are apparently very innocent, inasmuch as they consist of merely casting his eyes upon the ground. His delight is to enter a car, one side of which at least is well filled with ladles. He will seat himself on the opposite side of the car and begin his persecution, which is all the more cruel because there the noted Bill Hickman, the "destroy- is nothing tangible to resent. night for Gloster.

LITTE ROCK, Sept. 1 .- An Indian Territory dispatch says the removal of cattle from the Cheyenne and Arapahoe reservations is progressing as rapidly as conditions will permit. Several of the largest cattle owners have removed their entire herds, excepting such stock as e caped the recent round up. Within the last two weeks, more than 75,000 head of cattle have been driven off the reservation, which number, add ed to those already removed, make a total of over 100,000. The estimated number remaining is between 60,000 and 75,000 head. These will be taken out as speedily as possible. Only a few days beyond the date fixed by President Cleveland's proclamation will be required to clear the entire reservation of all cattle which do not rightfully belong there. Cattle men accepted the situation cheerfully. There is concerted action among them to comply with the executive mandate. The loss is estimated at ten to seventy-five thousand dollars. The bulk of the cattle is being driven or shipped to Western ranges.

Draft of the New Spanish Treaty. MADRID, Sept. 1 .- Mr. John W. Foster, the American minister, spent a fortnight at the royal palace of La Grange. He had frequent interviews with Senor Elduacyen, minister of foreign affairs, on the subject of a proposed commercial treaty between Spain and the United States. It is understood that though a treaty was not signed, an agreement was reached between the representatives of the two governments by which the reciprocity provisions contained in the former treaty were abandoned. The new treaty is confined to reform in the Cuban customs laws. Spain accepts the in-terpretation of the modus vivendi, signed in February, 1884, which was contended for by the United States. The settlement of the claims of American citizens against the Spanish government arising from insurrections in Cuba is provided for.

For four hours the fight waged fiercely, clubs and stones being freely used by both sides, and many persons were injured. Finally the police, who had, in the meantime, been reinforced, with the aid of the military not engaged in the riot, quelled the disturbance.
